

ALTERNATIVE EDUCATION

Farming for Young People at Knights Care Farm

EXPERIENCE IT ALL

Farming for Teens is a day service offered to young people. We can design plans tailored to an individual student and support them to carry out many activities. Knights Care Farm assists Young people age 12+, enabling them to enjoy the outdoors, whilst learning valuable skills.

We offer this alternative method of education to those who may have fallen out of mainstream education or to those who just need something different.

Why come to Knights Farm?

Spending time at Knights Care Farm can have an amazing effect, offering students the opportunity to do meaningful work, in a supportive, therapeutic environment. We provide the opportunity to be part of a team, whilst completing tasks on the farm: looking after farm livestock, using farm and horticultural equipment, maintaining conservation projects and working in the produce gardens. Our focus is always on the things that a student can do rather than on things that they cannot.

Everyone at Knights Care Farm plays an important part within our team. Through Teen Farming, students build confidence and social skills as well as the small but essential things like being on time and being polite to others. Skills such as animal welfare, communication and teamwork are all part of an average day.

We can provide the opportunity to complete AQA or other educational units to gain vocational accreditations. Just ask for more information.

2019 Winners

Best Adult Dairy Care Service 2019: Devon

- Social needs
- ADHD
- Autism
- Dyslexia
- Dyspraxia
- Rehabilitation
- Down Syndrome
- Global Delay
- Additional needs
- Young Offenders
- Mental Health

The Unit Award Scheme (UAS) with AQA

Knights Care Farm is a registered centre to participate in the AQA accreditation Unit Award Scheme. We are able to assist all our students and service users to learn on the farm and achieve a certificate, recognised formally by the AQA.

There are no limits on:

- what can be accredited, as long as it is worthwhile for the learner
- who can achieve, in terms of ability
- how long it takes to achieve or when this takes place
- how learning can be evidenced

The AQA Unit Award Scheme is invaluable as it is an important pathway for our service users to receive accreditation for their achievements. A vast range of units, which are level differentiated, allows accreditation to be accessible to all individuals, regardless of their ability.

AQA have trained our staff to allow amendments and the ability to write our own units. We are able to expand and customise units to serve users individual learning interests and needs.

To join the scheme, there is a one off 'student charge' in addition to the daily service user rate. There after, the service user can work towards as many skills as they wish, at their own pace. Once a unit is complete, it takes approximately 2 weeks to be approved by the AQA and to get a certificate.

Farming on Prescription

Initially, contact GP's or Support Workers regarding funding with a view to obtaining a referral.

Once a referral has been received, we will contact the funding provider. Once funding is in place, we will contact you to arrange a suitable date and time for potential students to visit the farm.

We are happy to liaise with any and all authorities, so do get in touch.

Applying for care...

With a proven track record, approval from Devon County Council and experience of liaising with CAMHS, we can support and guide applicants through the funding process.

We can organise 1 to 1 supervision for students that require the most support, backed by high value Public Liability Insurance.

The application process is never an obstacle for us. Please don't hesitate to get in touch.
